戊戌(狗)年 – 2018/2019 之本国市势行情

Forecast on Domestic Market Trend in the year of Wu Xu (Dog) - 2018/2019

本学院预测本国马来西亚今年（戊戌年 2018/2019）的市道走势表现平平，没有出现沦陷的迹象。倘若人民能保持平常心，不存有过份奢华的要求，今年的市道走势亦会有乐观的色彩。虽然有风云莫测的现象干扰局势，只要人民稳定情绪，以一动不如一静的心态去应对，勇毅前进，柳暗花明又一村，时机就会在前方。

回顾往年的市道走势与运作，金融走势疲弱，石油价格自由浮动，马币疲软等种种的事迹，造成生活指数不断上升，而人民可以说是在劣境中求存。由于经历过往年种种负面事迹的洗礼，预测在今年的经济过渡时期里，民众已可适应并作有效的应对，固此理应可以过着平稳的一年。

预测今年的市道走势虽然在平线之上游走，消费饮食业市场则有过供的迹象。倘若中小企业与轻工业得到政府的关照及融资上的协调，拓展业务及提高就业空间，市场过供泛滥的问题便有机会缓和。今年外资在本国投资，有助于本地工商业扩大就业空间，协调本国的市道走势，进而趁势提升。虽然本国市势得到协调而步向平稳前进，但最重要的还是人民能以积极的思维去正视国家在行政上的协调需要，并以正能量去配合新的政策。这不但使政府与人民能够摒弃成见，同步放手前进，亦造就今年的经济与生活指数得到稳定前进，安享升平时势。

Institute of Fortune Telling & Geomancy Fan Yang predicts that the market trend for Malaysia in this year of Dog (2018/2019) will be mediocre, and there is no sign of slump. The market trend of this year will still present an optimistic scenario if people can keep calm and refrain from desire of excessive aspiration. The market environment will be perturbed by unpredictable events. People should keep a stable mood, handle the situation steadily, move forward boldly, and they will overcome the difficulty, seizing the opportunity that comes.

Through reviewing the trend and operation of the market in the past year, we can see the weakness in the financial trend, free floating of petroleum price, weakness of the Malaysian Ringgit, and so on. All the above factors led to non-stopping rise of livelihood index, making people struggle amidst this adverse condition. Having experiencing various unfavourable events, the people can adapt to the situation now, and will be able to get through this year which is a financially transitional period.

We predict the market will still be treading in a horizontal manner this year. However, there will be a situation of oversupply in consumerism and eatery outlets. This problem of excessive supply will be eased if the government pays concern and provides financial coordination to small and medium enterprises and light industry, enabling them to expand their business and raise employment. Foreign capital investing in Malaysia will help local industrial and business enterprises to expand their employment capacity, and will boost the market trend in Malaysia giving it impetus to rise. The Malaysian market movement will progress steadily

with this assistance. Nevertheless the main thing is people ought to have positive thinking to view properly the coordination requirement in the administration of the government, and to engage with the new policy with positive mentality. This will enable the government and the people to discard their mutual preconception and march forward with ease of mind to create a stable and progressive economy and livelihood index to earn prosperity together.

In terms of consumerism, people face great strain in coping with the increase in the cost of essential items, education, medical expenditure and so on. People find it difficult to adapt, and hence causes the financial system to lose its accurate operational path. Nevertheless, our prediction and analysis for these two months show that the way forward will still get a turn for the better if the people increase their optimism and comprehend the mode of the adjusting system of the market with positive attitude.</p>

10 th month	08/11/2018 06/12/2018	<p>Ambiguity and puzzlement in administrative figures in the 9th and 10th Chinese Lunar months created a tempest that impact heavily on the economy. Such sudden violent blows cause panic, robbing the market of its serenity. Mood vibrated incessantly, making the people losing their control and confidence, and feel lost. Based on previous experience, social leaders appealed to the people to maintain their awareness, to hold back their pessimistic feeling, and to observe carefully. Then they will be able to construct their desired models to enable the market to resume its thrust in the correct direction, and hence returning to normal situation soon. The national administration will be modified according to the changes that arise, and will fit well with the current situation and the needs of the people. This would bring about social peace which in turn will enable the economy to grow swiftly, and will enable all the enterprises to progress in the international financial and trading platforms. The people initially may not be used to the new administrative measures, and will have difficulty coping. It is essential for administrative policies to be beneficial to the people all the while.
